

Interns will assist with the Alaska Peninsula Bird Inventory (with an emphasis on shorebirds). First month: crew will attend safety and biological training and prepare gear / supplies for field camps. Around 10 May crews of two (one biologist or technician and one volunteer) will go to short-term field camps on the Alaska Peninsula to conduct shorebird inventories. Travel by small aircraft or helicopter. Biologists/technicians will lead point-count surveys and interns will assist with data recording and habitat delineation. From June 2-17 interns will assist with field gear cleanup, PC data entry, and data summarization. To Qualify you must have a college degree or junior/senior standing in wildlife or biology program, some knowledge of visual and vocal bird identification, interest in birds, interest in vegetation classification, be a meticulous data recorder, ability to work in inclement weather, use IBM-PC software, be in excellent physical condition, and be able to get along in a remote, no-amenities field camp. Initial training (bear safety/firearm safety/cold water safety) and necessary field equipment is provided and mandatory. Benefits include airfare, lodging, and food while in the field OR \$25 / day for food while in King Salmon. To apply - send detailed cover letter, resume (include name /contact for 3 references) to Susan Savage, [susan\\_savage@fws.gov](mailto:susan_savage@fws.gov) OR AK Pen National Wildlife. Refuge, PO Box 277, King Salmon, AK 99613, postmark by Feb. 24, 2006.
